

BACK OUR CAMPAIGN TO BRING ...

SUPERFAST BROADBAND

... TO EVEREST PARK

Find out more and register online at <http://fibre.everestpark.org.uk> or use the QRcode below

5 minutes of your time now could literally save you years waiting for webpages, email, movies and catchup TV to download...

- Everest Park (including the Glaciers, and the Linden Homes constructed earlier phase of the development) is one of only a small number of areas in Basingstoke left without any form of Superfast (fibre based) broadband; many properties in the town, including those in the surrounding estates in Popley, have *both* Virgin and Openreach (phone-line based) services available, offering maximum speeds between 78Mbps and 150Mbps. We have a fraction of these speeds, just 2-4Mbps.
- Taylor Wimpey claim "it's nothing to do with them" (but they could easily have paid Openreach to provide a fibre service - a cabinet costs about £30,000 - or installed 'free issue' Virgin Media cable!)
- Basingstoke & Deane council previously negotiated with Openreach, who at the time stated they would provide their Superfast fibre broadband service commercially; but where is it? And because Openreach said this, Hampshire County Council's BDUK (part Government funded) project to extend coverage, which has already enabled the other last few areas in Popley, cannot help!
- So **we want to get as many residents as possible to register their interest** in obtaining superfast broadband, both on our website, fibre.everestpark.org.uk, and at the official Openreach website. There is no commitment whatsoever by registering on either site.
- We will then approach Openreach, Basingstoke & Dean and Hampshire councils, Taylor Wimpey, and others, to try and get a Superfast service implemented as quickly as possible.

... and it could even boost the value of your home...

Register with us and read more about it:

fibre.everestpark.org.uk

And also please register with Openreach:
